

## TOPICS

The conference will cover advances and improvements in the following areas of Refrigeration & Air conditioning, but not limited to,

- Enhancement in Existing RAC System
- RAC Equipments, standard and testing
- Natural / New refrigerants and mixtures
- New Refrigeration Techniques
- CFD simulation and modeling in RAC
- Cold chain, transport, and cold storage
- Cold/ Heat recovery and energy efficiency
- Air-conditioning-Air Quality and its distribution
- Automobile Air-conditioning
